

## Task for interview

.....

Build dashboard by using framework (React, Vue, Angular):

- 1-Login as (super admin, admin, employee)
- 2-For employee can show order (you can use fake data for orders that store on database and upload pdf file with order that send to admin for accept or reject order)
- 3-Admin can do work for employee and accept and reject order and (add, delete, update) employee
- 4-Super Admin can do work for admin and (add, delete, update) admin
- 5-Build Log for this dashboard
- 6-Data inside Log that show only for super admin
- 7-Upload this code to Git in need to see tow comment first (init comment) and second (finish) only two comments (public)
- 8-Send screen shot for dashboard implementation with SQL file for database (MySQL) with username

and password for (super admin, admin, one of the employees)

.....

Dead Line for this task 19/12/2022 at 11:00 AM

Send MySQL file and screen shot to email and login informations
